

MACQUARIE

WordGenius REFERENCE LIBRARY

School Edition

The Australian Macquarie Concise Dictionary, Thesaurus and Spellchecker for PC

A large proportion of Australian school students now use a PC for most of their writing and a considerable proportion of their reading.

Imagine if they could always have Australia's National Concise Dictionary, Thesaurus and Spellchecker instantly available on their PCs.

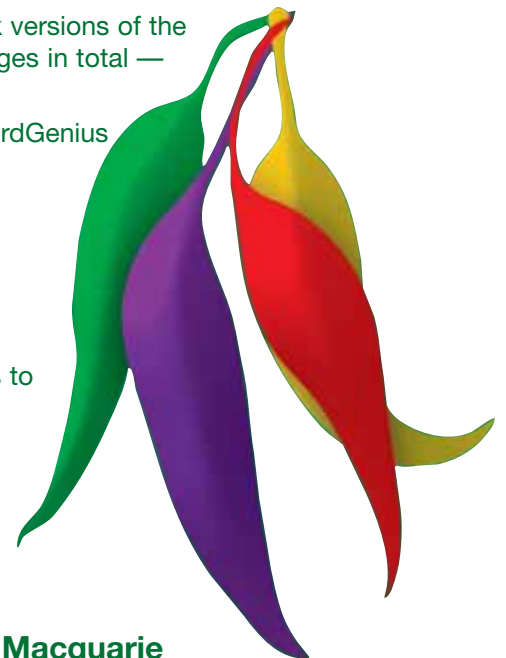

And imagine they could have all three for less than *half* the cost of the bulky book versions of the same Macquarie Concise Dictionary and Macquarie Thesaurus — some 2,305 pages in total — plus the Macquarie Australian English Spellchecker.

The Macquarie Library and WordGenius are proud to introduce the Macquarie WordGenius Reference Library School Edition — **the ultimate Australian English teaching and learning tool for student PCs**, comprising:

- **Macquarie Concise Dictionary**
- **Macquarie Thesaurus, and**
- **Macquarie 110,000+ word Spellchecker for Microsoft Office.**

Web based dictionaries are only available online and are likely to expose students to distractions. They are also too many clicks away and far too slow. Research has shown that students just do not use web based dictionaries.

This unique learning tool provides easy-to-use off-line access to this uniquely Australian resource for all students, and it's so fast and easy they will use it.

Macquarie Concise Dictionary

Used and endorsed by government and education throughout Australia, this is without doubt, an essential tool for all Australian students. This publication has more than 48,000 headwords, 119,000 definitions and over 5,000 encyclopedic entries, and also includes new words of contemporary English, in particular those relating to technology.

And now you can have it permanently and instantly available on the hard drive of your notebook or PC, with all 1,430 pages compressed into less than 6 MB on the drive.

Macquarie Thesaurus

This companion to the Macquarie Concise Dictionary is the first thesaurus ever to be based on the distinctly Australian use of English.

Whenever you need to find the right word or phrase for the right occasion — general or technical, formal or colloquial — the Macquarie Thesaurus is for you.

The Macquarie Thesaurus features more than 200,000 synonyms, but its 875 pages will take up less than 3 MB on your computer.

Macquarie Australian Spellchecker

It is easy to use the spellchecker that comes with Microsoft *Word* and other Microsoft *Office* applications — but the results are not always correct or even relevant, and *Word's* ideas about Australian spelling can be both a surprise and a surprize, to say the least.

The Macquarie Australian Spellchecker solves the problem by providing more than 100,000 words, and it *knows* how Australian English is spelt!

The conversion is automatic and the way you use your spellchecker will not change at all, but the results will be vastly superior.
