WordGenius REFERENCE LIBRARY

Perfect your vocabulary, literacy and communication skills - whilst you read and write on your PC!

The complete Australian Macquarie Dictionary, Thesaurus and Spellchecker on your PC

Like most people in Australia, you are probably doing more than 90% of your writing on a computer, and much of your reading as well.

Now you can *always* have the complete, unabridged versions of Australia's Macquarie Dictionary, Thesaurus and Spellchecker *instantly* available off-line on your PC for a small fraction of the cost of the bulky book versions.

The Macquarie Library and WordGenius are proud to introduce the Macquarie WordGenius Reference Library - **the ultimate reading and writing productivity tool for PCs**, comprising:

- **Macquarie Dictionary - Fourth Edition**
- **Macquarie Thesaurus, and**
- **Macquarie 112,000+ word Spellchecker for Microsoft Word**

WordGenius is far superior to Web based online dictionaries which are too slow and too many clicks away, only available when you're connected on-line and are extremely costly with all the distractions they thrust upon you. The WordGenius tools are so fast and seamless that your propensity to use them is greater, and because there are no distractions you can access the Dictionary and Thesaurus without ever losing your train of thought.

Macquarie Dictionary 4th Edition

Used and endorsed by government and education throughout Australia, this is without doubt, the definitive Australian dictionary.

With more than 112,000 headwords, 32,000 subsidiary headwords, 212,000 definitions, 22,000 encyclopedic entries and 25,000 illustrative examples (3,500 of them drawn from Australian texts), it is easily the most comprehensive account of Australian English ever produced.

And now you can have it permanently and instantly available on the hard drive of your notebook or PC, with all 6 kgs of this very large book compressed into approximately 10 MB on the drive.

Macquarie Thesaurus

This companion to the Macquarie Dictionary is the first thesaurus ever to be based on the distinctly Australian use of English.

Whenever you need to find the right word or phrase for the right occasion — general or technical, formal or colloquial — the Macquarie Thesaurus is for you.

The Macquarie Thesaurus features more than 200,000 synonyms, but its 992 pages will take up less than 3 MB on your computer.

Macquarie Australian Spellchecker

It is easy to use the spellchecker that comes with Microsoft *Word* and other Microsoft *Office* applications — but the results are not always correct or even relevant, and *Word's* ideas about Australian spelling can be both a surprise and a surprize, to say the least.

The Macquarie Australian Spellchecker solves the problem by providing more than 112,000 words extracted from the 4th Edition of the Macquarie Dictionary, and it *knows* how Australian English is spelt!

The conversion is easy and the way you use your spellchecker will not change at all, but the results will be vastly superior.

WordGenius is used by hundreds of thousands of Australians every day including the Australian Government, Parliamentary Library, Hansard, Attorney-General's Department and the ABC.

Brilliant additional features

The benefits of having this ultimate reading and writing tool on your computer are not confined to instant availability or much lower costs. WordGenius is also an extremely powerful productivity tool guaranteed to raise the standard of literacy and expand the user's vocabulary, and above all improve both yours and your organisation's communication skills. **The Macquarie Dictionary WordGenius and Macquarie Thesaurus WordGenius readily integrate with each other, are much easier and faster to use, and much more powerful than their book-bound equivalents, and they never wear out.**

For example:

- Find the meaning of any word in **any Windows** application, including any word processor, email or Internet browser, by simply selecting the word and dragging it on top of the Drag-on icon on your computer's desktop.
- The same applies if you want to find a synonym, associated or related word etc., but this time you drag the word onto the Macquarie Thesaurus Drag-on icon.
- If you do not know the correct spelling for a word, you can easily find the word you want by searching for the part of the word you do know and using asterisks (*pre*). If you are stumped on a crossword, you can quickly find the word you want by entering the letters you already know, along with the right number of "gaps" using question marks (ta????ada?).
- You can use the dictionary as a "reverse dictionary", simply by searching within the Definitions rather than the Headwords. All words, numbers and strings of words are searchable so you can find "1929" and "to be or not to be" in the Definitions.
- If you want to research Australian colloquial meanings, it's just a matter of searching the Definitions for "colloq*" and all the colloquial words will be displayed.
- The dictionary definitions include a user-friendly, written pronunciation guide, but if you like you can also use the built-in audio pronunciation assistant that pronounces the word phoneme by phoneme. Ideal for ESL students.
- Definitions etc., can be dragged or copied into other documents at will, or printed out if you choose.

All of this is instantly available because the Macquarie WordGenius Dictionary and Thesaurus files on your computer are fully indexed, remain fully compressed and the content is fully protected and cannot be changed.

Brilliant compatibility

The Macquarie WordGenius Dictionary and Macquarie WordGenius Thesaurus can be used with any version of Windows from Windows 98 through to Windows Vista and work in conjunction with **all** Windows applications, including word processors, email and internet browsers.

The Macquarie Australian Spellchecker works with Microsoft Word, PowerPoint, etc. from Office 2000 onwards, including Office XP and Office 2003.

Brilliant value

The Macquarie WordGenius Reference Library sells for significantly less than the normal price of the three individual components. It is also designed to be cost-effectively installed as a Site Licence through the network server using MSI.

Substantial discounts are available for multiple user Site Licences.
