Code and Group Faster, more Accurately and more Cost Effectively

TurboGrouper is the new coding and grouping solution you need to improve accuracy and reduce your costs.

- **Now with CodeSuggest, DRG Preview and AR-DRG MultiVersion Select**
- **Interface to Dedalus i.PM and WebPAS Patient Administration Systems, and compatible with HL7**
- **Secure and fast to download, install and update**

Tested and approved to verify the correct AR-DRG is assigned to patient coded data by the Independent Hospital Pricing Authority (IHPA).

TurboGrouper™ with TurboCoder

TG20211105

Rate your current coding and grouping solution:

Can you switch between AR-DRG versions and get real-time grouping?

How long does it take to code and group one episode?

How often do you generate wrong codes?

What was your last audit accuracy?

How much do you pay for your coding and grouping software?

How much additional server and networking is required for your coding and grouping software?

How long does it take to get your software updated?

Enhanced Coding ability

- Always find the right code. TurboGrouper with TurboCoder now features **CodeSuggest** to intelligently prompt coders with diagnosis and intervention codes, **Type-to-Search** index searching, **Includes/Excludes notes** – in context and **EasyView Coding Rules**

AR-DRG MultiVersion **SELECT** and DRG **PREVIEW**

- Switch and view AR-DRG code in selectable Versions from 4.2 to 10.0 in real time.
- Instantly preview DRG reimbursement and the Episode Clinical Complexity Score (ECCS).
- Switch and compare ICD-10-AM code in selectable Editions from First to Eleventh in real time.

Powerful **NETWORKING** technology

- Enables the TurboGrouper to execute on the node of the network and creates minimal load on the server and network.
- NO additional hardware resources or network bandwidth required – performs like a local installation.
- Save on capital investment and ongoing maintenance cost.

SECURITY

- **VeriSign® CodeSigned** – secured in download transit and content uniquely encoded to protect its integrity in perpetuity.
- Installs OFFLINE on the PAS server to protect the patient record.
- NO patient information stored.
- NO need for web access – code and group independent of web speed.

TurboGrouper™ with TurboCoder

TurboCoder seamlessly integrates with the **TurboGrouper**

Powerful **SEARCH** through eComPress® technology

- Easily search and navigate all words, numbers and codes.
- Type-to-Search index searching.
- Access fully hyperlinked Disease and Intervention codes, Coding Standards, Coding Rules and AR-DRGs.
- Pre-emptive Search Spelling Help (PSSH) suggests terms after you type three or four characters, even if you mistype.

NEW FEATURES

CodeSuggest

Computer-assisted coding (CAC) that accelerates the coding process

Accessible

Includes:
Excludes:

View all levels of Includes/Excludes notes without continually scrolling back

DRG Preview

Gives instant preview of DRG reimbursement to assist fully informed coding and accuracy

Type-to-Search index searching

Type-to-Search significantly speeds up index searches by sequentially finding modifiers in the ICD-10-AM and ACHI indexes after the Lead term search has been found.

Transparent coding pathways

View all disease and intervention codes used in a grouping and in context. Adjust codes on-the-fly if necessary with immediate AR-DRG correction.

Includes/Excludes notes – in context in the Tree Table of Contents

View all three levels of *Includes* and *Excludes* notes for individual codes without having to scroll back to the top of each chapter, block, category or code title.

EasyView Coding Rules

EasyView allows you to view the Coding Rule Title as you roll the cursor over the CR icon, enabling you to determine if the Coding Rule is relevant to the episode being coded.
This is especially useful when there are many CR icons applied to a code.

TurboGrouper™ with TurboCoder

FAST

Fast installation. Fast updates. And fast code selection and instant, real-time grouping, all-in-one.

ACCURATE

Real-time display of the DRG and reimbursement with a clear coding pathway.

AFFORDABLE

Affordable licence fees are user-based, rather than separation-based.

Features and Benefits:

Fast installation and prompt updates

TuroGrouper downloads and installs in minutes. Updates are always timely and install just as fast.

Superior Digital Referencing

Gives clinical coders access to all the necessary digital classification reference materials with the click of a button.

Easy-to-Use Annotation

TurboGrouper Notes provides a powerful and easy-to-use facility to share content and notes with other users by email or on the LAN/WAN.

MultiView

View multiple volumes on-screen at the same time for improved efficiency.

Drag-and-Drop

Compiling code reports is easy, and requires little training to master.

Flexible User-Based Licencing

Available in both single-user and multi-user network licencing, allowing you to have more control over your spending.

Built by clinical coders, for clinical coders

TurboGrouper has been designed and built in conjunction with clinical coders with over a decade of experience using ICD-10-AM and ACHI Coding.

Call to arrange a demonstration so you can save money, and discover how TurboGrouper can improve your clinical coding and grouping with faster speed and better accuracy.

Developed by the designers and makers of award-winning eComPress technology, TurboGrouper with TurboCoder gives you powerful search, coding, and grouping functionality in a single easy to use platform.
